

ADJUSTABLE PILE TOPS

The unique design of Levelmaster pile tops allows for an enormous 120mm of adjustability, this makes for simpler repiling or easy adjustability that aids in a quick foundation installation. The system also future proofs your investment in the case any events that cause soil movement, the structure can effortlessly and be relevelled at minimal cost.

Slow traditional methods of house stumping require heavy hydraulic jacks, packers and complicated machinery. One person with three simple tools can easily adjust LevelMaster house stumps, saving you time and money

The LevelMaster adjustable pile tops are finished in hot dipped galvanising for added protection and have been fully engineered and designed. Therefore meeting all the requirements of the Building Code.
